

# We are TLS

## Who we are

- TLS brings more than 35 years of professional learning experience helping teachers deliver instruction that promotes student learning.
- TLS is comprised of educators, facilitators, and coaches who live and work in Southeastern Pennsylvania and New Jersey.
- TLS builds relationships with administrators and teachers by meeting them where they are, and inviting them to take the next step.

## What we do

We assist and support teachers as they clarify the curriculum, use ongoing formative assessment, engage learners at the correct level of difficulty, and establish a learning environment where they can gain and maintain student cooperation.

“I’m excited to read the positive reflections from our teachers regarding their learning, their experiences, and the desire to continue to engage in collaborative discussions with the cohort. The reflection by the participants supports the positive and significant impact this type of professional development with embedded coaching provides to effect change.”  
- Curriculum Director

“It really was the best PD that I’ve gone through to date! Going through your program really changed how I think about differentiating, and I know that it has improved my teaching. Before I felt as though DI was a bit “unreachable” - difficult to plan for and to implement. I realized that I had already been doing some of it, but you helped me put all the pieces together. Now I really feel as though it’s a part of my every day in the classroom.”

- High School Math Teacher
